UN – July 2023

- On September 6, U.S. Secretary of State Antony J. Blinken announced more than \$206 million in additional humanitarian assistance for the people of Ukraine, bringing the total USG contribution to the response to more than \$2.8 billion since February 2022.
- GoR forces continued to target civilian population centers across Ukraine with waves of aerial attacks in recent weeks, including a September 6 attack against Donetsk *Oblasť*'s Kostiantynivka city that resulted in at least 17 civilian deaths and injury to at least 32 other people.
- USG partners delivered critical humanitarian assistance to frontline communities through UN-led convoys during August.

KEY DEVELOPMENTS

USG Announces \$206 Million in Additional Humanitarian Funding to Ukraine

On September 6, Secretary Blinken announced more than \$206 million in additional U.S. Government (USG) funding—including more than \$54 million from USAID/BHA and more than \$152 million from State/PRM—during a visit to Ukraine’s capital city of Kyiv. This funding will bolster USG partners’ efforts to provide critical humanitarian assistance, including health, multi-purpose cash assistance (MPCA), protection, shelter, and water, sanitation, and hygiene (WASH) support, to conflict-affected populations in Ukraine. The newly announced USAID/BHA funding includes a \$25 million contribution to the Ukraine Humanitarian Fund (UHF), a country-based pooled fund managed by the UN Office for the Coordination of Humanitarian Affairs (OCHA.) The UHF provides fast and flexible allocation of funding to UN agencies, nongovernmental organizations (NGOs), and local partners in Ukraine—including civil society organizations, national NGOs, and volunteer groups—based on identified humanitarian needs.

The USG remains the largest donor to the Ukraine humanitarian response. Since the start of Russia’s full-scale invasion of Ukraine in February 2022, the USG has provided more than \$2.8 billion in total humanitarian assistance to support the people of Ukraine and those fleeing to neighboring countries, including nearly \$2 billion in USAID/BHA humanitarian assistance.

GoR Intensifies Attacks Against Population Centers Amid Ongoing GoU Counteroffensive Operations

Government of Russia (GoR) forces intensified aerial attacks—including artillery, missiles, and unmanned aerial vehicles (UAVs)—against civilian populations centers far from the front line during August amid ongoing Government of Ukraine (GoU) counteroffensive operations. Between August 14 and 15, GoR forces launched at least 28 missiles—16 of which were intercepted by Ukrainian air defenses—targeting eight *oblasts*. In western Ukraine, one missile impacted a factory in Volyn *Oblast*, resulting in three civilian deaths and injury to several others. Meanwhile, six of the 28 missiles struck civilian infrastructure in Lviv *Oblast*, causing injury to at least 19 people, according to local GoU officials. During the same attack, two of the missiles struck Cherkasy *Oblast* in central Ukraine, damaging energy infrastructure and resulting in power and water outages, international media report. Additionally, GoR forces launched a wave of 17 UAVs—15 of which were reportedly intercepted by Ukrainian air defenses—across the country on August 19, with one UAV striking an ammunition depot in western Ukraine’s Khmelnytskyi *Oblast*, according to international media. The attack against Khmelnytskyi resulted in a large explosion and damaged approximately 400 buildings in the *oblast*. The same day, a GoR missile struck a theater in the central square of Chernihiv city in northern Ukraine’s Chernihiv *Oblast*, resulting in seven civilian deaths and injury to at least 180 others, local GoU officials report. Additionally, on August 30, GoR forces launched a wave of 28 missiles and 16 UAVs against Cherkasky, Kyiv, Mykolayiv, Odesa, and Zhytomyr *oblasts*, international media report. Ukrainian air defenses intercepted all of the missiles and 15 of the UAVs; however, falling debris from the large-scale aerial attack triggered multiple fires and resulted in two civilian deaths and injury to several others in Kyiv city.

GoR forces also continued persistent attacks against frontline areas of Ukraine in recent weeks. On August 10, a GoR missile attack against eastern Ukraine’s Zaporizhzhya *Oblast*’s Zaporizhzhya city struck a hotel frequently used by UN and international NGO (INGO) staff, resulting in one civilian death and injury to at least 16 others, the UN reports. One day prior, a GoR missile that struck Zaporizhzhya city resulted in one civilian death and injury to at least 14 others, according to international media. Local

GoU officials subsequently ordered mandatory evacuations from dozens of settlements along the front line in Zaporizhzhya on August 10 due to the intensified hostilities. On August 28, GoU officials announced that Ukrainian forces had retaken southeastern Ukraine's Robotyne settlement in Zaporizhzhya from GoR forces amid ongoing GoU counteroffensive operations, according to international media. Residents of Robotyne, located approximately six miles south of Orikhiv city, experienced intense hostilities prior to the liberation of the settlement.

Meanwhile, persistent GoR attacks resulted in civilian casualties and damage to civilian infrastructure in eastern Ukraine's Donetsk *Oblast* during August. In Pokrovsk city, a GoR missile attack damaged civilian infrastructure, including a hotel and a multi-story residential building between August 7 and 8, with a subsequent attack on the same site injuring several first responders who were conducting search and rescue operations, according to international media. The two consecutive attacks in Pokrovsk resulted in nine deaths and injury to at least 82 others, including 29 police officers and seven emergency workers from the State Emergency Service of Ukraine (SESU), GoU officials report. Hostilities have resulted in the deaths of at least 78 rescue workers and injury to more than 280 others since February 2022, according to the SESU. Additionally, on August 18, an artillery attack against Donetsk's Chasiv Yar town, located approximately four miles from the front line, damaged a local humanitarian hub and injured four people, according to international media. As of July, approximately 1,000 civilians remained in Chasiv Yar, compared to a pre-invasion population of 15,000, despite limited access to basic services amid persistent hostilities. On September 6, a GoR missile also struck a crowded market in Kostiantynivka city, located near the front line. Preliminary reports indicate that the attack resulted in at least 17 civilian deaths and injury to at least 32 other people, according to GoU officials. The USG and its partners continue to closely monitor conflict dynamics and any related impacts on humanitarian conditions in affected areas of Ukraine.

GoR Forces Continue to Target Ukraine's Port Infrastructure Following Withdrawal From BSGI

The GoR's withdrawal from the Black Sea Grain Initiative (BSGI) on July 17, coupled with persistent aerial attacks targeting agricultural and port infrastructure, continues to threaten global food security, according to international media. The BSGI—an agreement launched by the GoR, the GoU, the Government of Türkiye, and the UN—facilitated the safe export of agricultural goods from Ukraine's ports on the Black Sea to world markets. Following the GoR's withdrawal from the agreement, GoR forces have intensified attacks against port infrastructure in southern Ukraine. Between August 15 and 16, GoR forces launched a UAV attack against Reni port along the Danube River in Odesa, resulting in damage to grain storage facilities, international media report. Additionally, GoR forces launched another wave of UAVs against port infrastructure in Odesa's Izmail town on August 23. The attack damaged agricultural commodities and several storage facilities, including three grain silos, and destroyed approximately 13,000 metric tons (MT) of grain, reducing Izmail's export capacity by an estimated 15 percent, according to GoU officials. GoR forces launched additional aerial attacks targeting port infrastructure in Odesa between September 3 and 5 that resulted in one civilian death and injury to at least two others, GoU officials report. In late August, the UN warned that repeated attacks against Ukraine's agricultural and port infrastructure will likely adversely affect livelihoods in the country and continue to disrupt global supply lines. However, GoU officials reported that four ships had departed Ukrainian ports through a temporary corridor in the Black Sea as of September 1, which may indicate a potential alternative route for the shipment of grain and other commodities to global markets, according to international media.

USG Partners Deliver Critical Assistance to Frontline Communities Via UN Convoys

In mid- to late August, the UN and its partners continued to deliver critical aid to frontline areas in Ukraine through humanitarian convoys, which frequently comprise USAID/BHA partners the International Organization for Migration (IOM), the UN Children’s Fund (UNICEF), the UN Population Fund (UNFPA), the UN World Health Organization (WHO), and the UN World Food Program (WFP), as well as State/PRM partner the Office of the UN High Commissioner for Refugees (UNHCR). On August 9, a UN-led interagency convoy delivered food, hygiene kits, medicine, safe drinking water, shelter materials, and other relief commodities to Donetsk’s Toretsk town, marking the fifth UN-led convoy to reach Toretsk in 2023, the UN reports. Another humanitarian convoy delivered safe drinking water, sleeping bags, and solar lamps to support more than 2,000 people in Zaporizhzhya’s Dobropillya town on August 11. USAID/BHA partner WHO also distributed medical supplies—including disinfectants, medicine, personal protective equipment, plaster casting materials, and other medical equipment—as part of the convoy.

On August 17 and 23, a separate UN-led humanitarian convoy—which included USAID/BHA partners IOM, UNFPA, UNICEF, WFP, and WHO, as well as State/PRM partner UNHCR—delivered 50 MT of relief commodities, including food, hygiene kits, and shelter supplies sufficient to support approximately 4,000 people in Kharkiv *Oblast’s* Kupyansk *hromada*, the UN reports. Another UN-led convoy reached Kharkiv’s Borova settlement—approximately 19 miles from Kupyansk city—on August 18 and delivered an additional 25 MT of food, hygiene kits, shelter repair materials, and other relief supplies. On August 23, an additional UN-led convoy, comprising three USAID/BHA partners and one State/PRM partner, delivered critical assistance, such as medicine and shelter repair materials, sufficient to support nearly 1,000 people residing in three frontline settlements in Kharkiv.

KEY FIGURES

1.2 Million

People in Ukraine reached with USAID/BHA-supported in-kind food assistance via WFP in July 2023

12

USG implementing partners providing MPCA

U.S. GOVERNMENT RESPONSE

FOOD SECURITY

To meet increasing food needs since the GoR invasion, USAID/BHA is supporting WFP and three INGOs to provide food assistance in Ukraine. WFP continues to prioritize food distributions in eastern and southern Ukraine, where fighting and supply chain disruptions hinder food access for vulnerable populations in frontline areas. During July, WFP reached more than 1.2 million people in Ukraine with in-kind food distributions, including children who received supplementary feeding to prevent malnutrition.

MULTIPURPOSE CASH ASSISTANCE

The USG supports the International Federation of Red Cross and Red Crescent Societies (IFRC), IOM, UNHCR, WFP, and eight INGOs to provide MPCA. Cash in the form of cash-based transfers and vouchers allows displaced or other conflict-affected people to meet their immediate needs—such as clothing, food, fuel, shelter, or utilities—through local markets and provides a more efficient means of reaching vulnerable communities than providing in-kind commodities. With support from USAID/BHA and other donors, WFP provided cash transfers for food to

more than 165,000 conflict-affected individuals across Ukraine in July alone. Additionally, State/PRM partner UNHCR reached approximately 299,000 people inside Ukraine with MPCA between January 1 and July 31. State/PRM is also supporting IOM to provide MPCA to refugees in neighboring countries, as well as UNICEF to provide cash assistance to vulnerable households with children in transit.

2.8 Million

People able to receive health care with supplies distributed by USG partner UNICEF in 2023

HEALTH

To support the health needs of conflict-affected populations, USG humanitarian partners are providing health care supplies, medicine, and other health assistance in Ukraine and neighboring countries. USAID/BHA is supporting UNFPA, UNICEF, WHO, and seven INGO partners to respond to emergency health needs in Ukraine. With USG and other donor support, UNICEF has supported access to health care services for nearly 2.8 million children and women through the distribution of medical supplies and equipment since the beginning of 2023. Moreover, UNICEF has deployed mobile medical units—comprising doctors, nurses, and psychologists—to provide health services to more than 21,400 people in frontline areas in 2023. Meanwhile, as of mid-July, WHO had delivered more than 240 generators and nearly 2,400 MT of medical supplies to Ukraine since March 2022, the UN agency reports.

State/PRM is also supporting IOM, UNFPA, UNICEF, WHO, and other international organizations to provide health care services to refugees in neighboring countries. This support includes meeting urgent trauma care needs by deploying emergency medical teams, delivering essential medical supplies and equipment, providing support for persons with disabilities, and providing logistics support to fill urgent gaps. State/PRM health support in multiple countries in the region serves to strengthen the capacity of local health systems to support increased numbers of refugees.

20

USG implementing partners providing essential protection services

PROTECTION

Armed conflict often exacerbates protection risks. Civilians must cope with threats such as sexual violence, family separation, exploitative labor, exclusion from life-saving humanitarian assistance, and domestic abuse. In response, USAID/BHA supports IOM, UNFPA, UNICEF, UN Women—through USAID/BHA’s partnership with the UN Development Program (UNDP)—and WHO, as well as 13 INGOs and two Ukrainian NGOs to implement protection interventions for conflict-affected populations in Ukraine. USAID/BHA partners provide mental health and psychosocial support (MHPSS) services to children, persons with disabilities, and older people; operate mobile protection teams to reach remote communities with gender-based violence (GBV) prevention and response activities, legal assistance, and MHPSS; and conduct other protection activities. Since the beginning of 2023, UNICEF-supported MHPSS interventions had reached more than 1.3 million children and caregivers to help them cope with the psychological effects of conflict and displacement as of July 31. UNICEF had also provided approximately 209,000 women and children with GBV

prevention, response services, and risk mitigation as of the same date.

In addition, State/PRM partners—including IOM, UN Women, UNFPA, UNHCR, UNICEF, an INGO, and other international organizations—provide legal services and protection to vulnerable individuals in Ukraine and neighboring countries. Services include GBV prevention and response, child protection, and MHPSS support; prevention of and response to trafficking in persons; and establishment of child-friendly and women- and girl-friendly spaces. Partners are also establishing Blue Dots, which are multi-agency facilities that provide one-stop protection services and social service referrals to newly arrived refugees in neighboring countries. As of August 29, UNHCR had established 35 Blue Dots which reach tens of thousands of people with protection services in Bulgaria, Hungary, Moldova, Poland, Romania, Slovakia, and Slovenia. In addition, State/PRM partner UNHCR and its partners reached more than 859,000 people inside Ukraine with protection services between January 1 and July 31.

3.1 Million

People supported with safe drinking water through USG partner UNICEF in 2023

WASH

Disaster-affected populations are often more susceptible to waterborne diseases due to reduced access to hygiene items, safe drinking water, and sanitation services. In response, USG partners are providing WASH support to conflict-affected populations, including distributing hygiene kits containing soap and other items; repairing damaged WASH infrastructure; and transporting safe drinking water to conflict-affected areas. Overall, USAID/BHA supports IOM, UNICEF, 10 INGO partners, and one Ukrainian NGO partner to address WASH needs in Ukraine. In 2023, UNICEF had provided access to safe drinking water for nearly 3.1 million people through the rehabilitation of water networks, the provision of water treatment equipment, and the distribution of safe drinking water as of late July. State/PRM partners are also providing WASH assistance in Ukraine and to refugees in neighboring countries, including distributing hygiene kits to refugees and strengthening sanitation infrastructure in shelters.

CONTEXT IN BRIEF

- The GoR commenced a full-scale invasion of Ukraine on February 24, 2022, after mobilizing hundreds of thousands of military forces and heavy weaponry near its border with Ukraine and subsequently launching widespread attacks. Immediately prior, the GoR had ordered forces into non-GoU-controlled areas of Donetsk and Luhansk *oblasts* after recognizing the areas' independence from Ukraine on February 21.
- The GoR invasion marked a major escalation of conflict in Ukraine, where fighting in the country's eastern *oblasts* had caused large-scale population displacement and widespread damage to infrastructure since March 2014. The heaviest fighting had occurred in the easternmost *oblasts* bordering Russia, particularly Donetsk and Luhansk; however, the large influx of internally displaced persons from these areas had also impacted neighboring *oblasts*. The UN estimated that 2.9 million conflict-affected people in eastern Ukraine required humanitarian assistance as of early 2022, prior to the February 24 GoR invasion.
- On February 24, 2022, USAID announced the activation of a Disaster Assistance Response Team (DART) to lead the USG humanitarian response to the crisis in Ukraine, with initial staff in Rzeszów, Poland; Chişinău, Moldova; Budapest, Hungary; Bucharest, Romania; and Bratislava, Slovakia. To support the DART, USAID activated a Response Management Team in Washington, D.C. State/PRM staff in Brussels, Belgium; Chişinău, Moldova; Geneva, Switzerland; Warsaw, Poland; and Washington, D.C., also continue to support response activities. As of August 2023, USAID maintains staff in Krakow, Poland; Kyiv, Ukraine; and Washington, D.C.
- On October 21, 2022, U.S. Ambassador to Ukraine Bridget A. Brink renewed the declaration of humanitarian need for Ukraine for FY 2023 due to widespread displacement and continued humanitarian needs of vulnerable populations in Ukraine resulting from Russia's full-scale invasion.

³ Year of funding indicates the date of commitment or obligation, not appropriation, of funds. Funding figures reflect publicly announced FY 2023 funding that has been committed or obligated by USAID/BHA and State/PRM as of September 6, 2023. For information on the USG funding toward the response in FY 2022, refer to Ukraine Fact Sheet #29 released on September 30, 2022, available on the USAID website at <https://www.usaid.gov/humanitarian-assistance/where-we-work>.

⁴ The locations of USAID/BHA NGO and INGO partners in Ukraine are not included in the funding chart due to sensitivities.

PUBLIC DONATION INFORMATION

- The most effective way people can assist relief efforts is by making cash contributions to humanitarian organizations that are conducting relief operations. A list of humanitarian organizations that are accepting cash donations for disaster responses around the world can be found at interaction.org.
- USAID encourages cash donations because they allow aid professionals to procure the exact items needed, often in the affected region; reduce the burden on scarce resources, such as transportation routes, staff time, and warehouse space; can be transferred very quickly and without transportation costs; support the economy of the disaster-stricken region; and ensure culturally, dietarily, and environmentally appropriate assistance.
- More information can be found at:
 - USAID Center for International Disaster Information: cidi.org
 - Information on relief activities of the humanitarian community can be found at reliefweb.int.

USAID/BHA bulletins appear on the USAID website at [usaaid.gov/humanitarian-assistance/where-we-work](https://www.usaid.gov/humanitarian-assistance/where-we-work)
