UCCA Launches Optics Campaign

Following Ukraine's recent successes in pushing back the enemy in the Kharkiv & Kherson regions, we need to make sure that the drive to free all of Ukraine's occupied territories continues and is successful.

As in previous campaigns, UCCA will be working with experts and former U.S. military personnel to purchase the necessary optics equipment and deliver it directly to the frontlines.

Our "Aiming for Victory" Goal is \$300,000
