

**UCCA
Special
Delivery
Mission:**

working to
secure Ukraine
and her people

May 2022

Funded, Acquired
& Delivered!

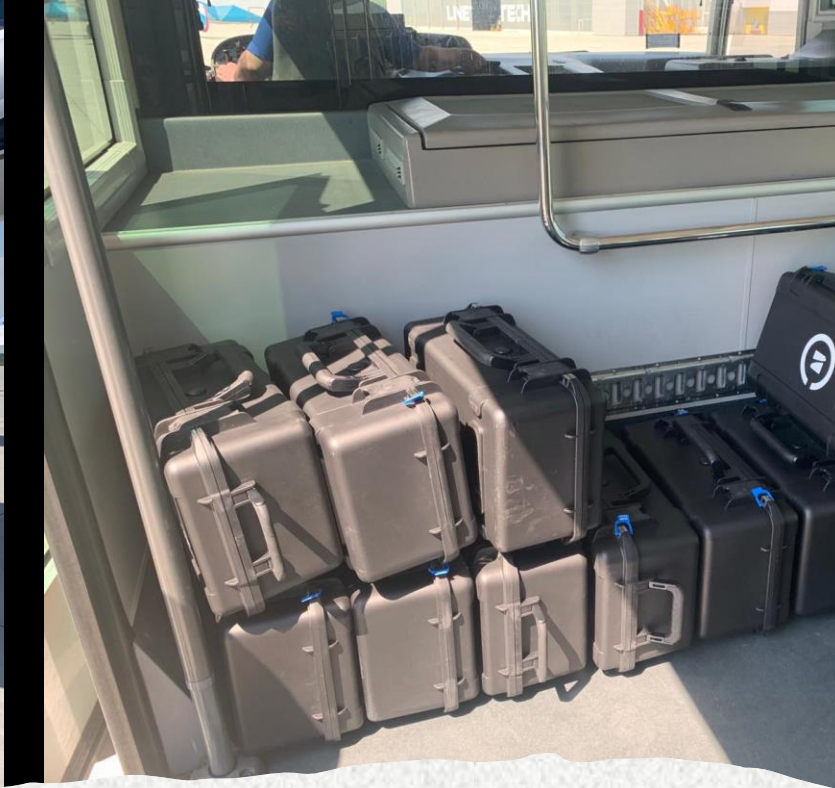

22 UCCA-funded
drones prepare
for transport to
Ukraine, via
Poland

Teterboro Airport
22 Drones loaded onto
private plane in New Jersey

Drones land at Rzeszow
airport in Poland

Team UCCA, Operation White Stork & Ukraine friends gather to head to the Polish-Ukrainian border, and then directly into Ukraine.

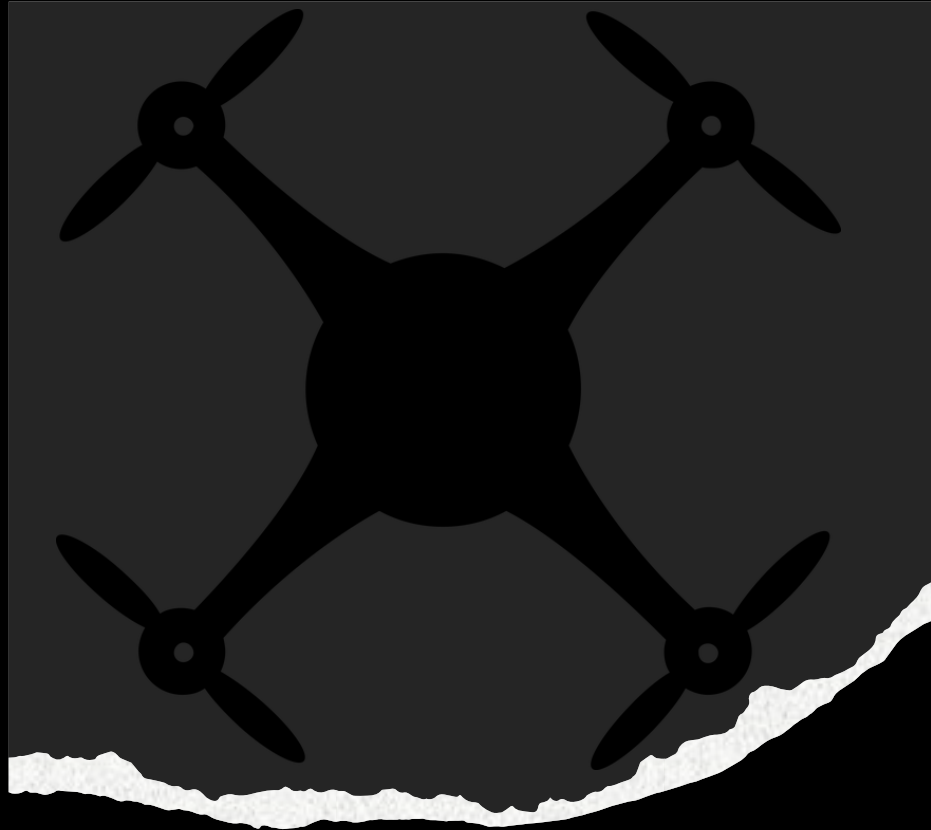

Drones & specially developed
IFAKs delivered to Oleksandr
Kamyshin, CEO of State-owned
Ukrainian Railways.

For you to understand how important for us this drone is.. Diesel sleeping but still holding the case 😂

The drone that UCCA provided is so important to the defenders on the frontlines that even while sleeping they make sure they have control of it at all times.

Due to security reasons and the safety of our Ukrainian freedom fighters, we are unable to publicize where and to whom the drones were delivered to on the frontlines.

A special thanks to our partners:

Brett Velicovich, American drone expert

Operation White Stork

KOACORE

Roman Fedorowycz

Ukraine Friends

THANK YOU...

Thanks to our supporters & donors, UCCA was able to purchase vital “eyes” to help protect Ukraine and her people.

UCCA’s partners delivered the drones to help secure evacuation routes, supply lines and Ukraine’s railroad system.

Drones were also delivered directly to our freedom fighters on the frontlines.

Special thanks goes out to Bo Bazylevsky & Friends
